

Mysql Backup Recovery and Replication

Duration : 3 Days

Course Outline

Backup and Recovery

- Backup and Recovery Types
- Database Backup Methods
- Using mysqldump for Backups
- Point-in-Time (Incremental) Recovery
- MyISAM Table Maintenance and Crash Recovery

Using Replication for Backups

- Backing Up a Replica Using mysqldump
- Backing Up Raw Data from a Replica
- Backing Up a Source or Replica by Making It Read Only

InnoDB Backup

Replication

Configuring Replication

Replication Solutions

- Using Replication for Backups
- Handling an Unexpected Halt of a Replica
- Monitoring Row-based Replication
- Using Replication with Different Source and Replica Storage Engines
- Using Replication for Scale-Out
- Improving Replication Performance
- Delayed Replication

Replication Implementation
